

### **Comments from 4<sup>th</sup> year veterinary students in dental rotation and/or dental elective course**

1. I am so appreciative for the equipment we got for dentistry. This opportunity and experience will be so valuable for practice. I am really going to take advantage of the machines while I'm here to learn how to use them effectively before graduation. Thank you again!
2. Being able to work with this tool was an amazing opportunity. The instrument is well designed with great LED light features and felt smooth while sectioning teeth. I'm very grateful to be one of the students that had the opportunity to handle this instrument, since it will improve the experience of students taking the Dentistry Elective and Rotation at school.
3. I enjoyed working with all of our new dental equipment today. Having experience with a high power drill and being able to section multi-rooted teeth (confidently) makes me an asset to my future colleagues. Exposure to these procedures and the proper use of the tools is very valuable. I love that veterinary dentistry is becoming so popular (one of my favorite areas of vet med) and I am grateful for the opportunity to grow comfortable with the equipment before embarking on my career in general practice.
4. I really enjoyed using the new dentistry equipment. The high speed drill/hand piece was so easy to use and felt comfortable. I loved the built in light feature too! I've seen similar tools used in small animal practices outside of school and feel very lucky to now have it available for use at TUCVM. This will really help prepare students for practice after graduation.
5. I really liked the new equipment. Everything worked easy, with no issues while using them. Nothing felt awkward and cords were plenty long enough.
